

How participants and Award centres help

We are very glad that Award centres and participants responded to the current situation and they volunteer in many different ways.

A lot of centres are involved in face mask sewing (even a so-called "masks tree" grew up in SVČ Rosice), many schools use their 3D printers to produce parts for protective shields for doctors and other professionals, students go shopping for seniors and deliver face masks where they are needed. Other participants share their knowledge in online tutoring for their classmates and friends. Eliška and Alena prepared a teaching material explaining English modal verbs using the current situation. We also know that DofE participants devote their time to creative activity and they write songs or draw pictures about coronavirus.

At the local centre **SPŠ and OA Bruntál**, pupils use 3D printers to produce parts for protective shields for healthcare professionals, but they also donated excess sheets for sewing face masks.

DofE graduates from the **Grammar School and SOŠ in Moravské Budějovice** prepared a great teaching material about coronavirus, which is also used to practice modal verbs. They are also involved in sewing face masks for the ones in need.

Students from **Open Gate** responsibly distribute masks in Prague and promote the motto: My mask protects you, your mask protects me! They also help the elderly with shopping and other necessities.

In the **SVČ Rosice** grew so-called "masks tree" and students also launched a competition for the most original mask. There is also an art competition "Without School" and a comic book competition "Extraordinary Holidays", where schoolchildren creatively portray what they do in quarantine.

More information on FB (in Czech language):

Helping the elderly is also very important now. For example Veronika Jílková from **VOŠ, SOŠ and Grammar School Evropská**, distributes shopping by bike and on foot.

They are also very active at the **Grammar School of Matyáš Lerch in Brno**, in which everyone with hands is sewing face masks!

The local centre **Grammar School Jateční in Ústí nad Labem** is active too. DoFE coordinator Zdeňka sews face masks and also crochets cloverleaves. The proceeds from the sale of the cloverleaves will go to support people who are now in a difficult situation.

At the same time, they have here skilled students, such as Kryštof Waněk, who helps children to use their free time actively by giving tips on various activities they can do inside their homes.
